

BDG SYNTHESIS

Certificate of Analysis

BDG Synthesis certifies that this reference material meets or exceeds the specifications stated herein.

Barry Dent

Barry R. Dent, PhD, Director
12 November 2011

Name: Clozapine-d₈
CAS Number: 5786-21-0 (unlabelled)

Structure:

Molecular Weight: C₁₈H₁₁D₈ClN₄ = 334.87
Lot Number: BDG 14055.3
Appearance: Pale yellow, crystalline solid
Corrected Purity: 99.9 % (HPLC) - 0.4 % (diethyl ether) - 0.4 % (dichloromethane) = 99.1 %
Isotopic Purity: Under 0.5 % d₀
Re-test Date: 12 November 2016

Storage and Handling: Temperature: refrigerate for prolonged storage; may be handled and shipped at ambient temperature.
Humidity: not believed to be hygroscopic; may be handled in normal laboratory atmosphere.
Light: store in an amber vial and protect from bright light.
Caution: only experienced laboratory personnel should handle the material.

Identity and Purity

Proton NMR Spectrum

Identity: the signals are consistent with the proposed structure and in accord with literature where available.

Isotopic Labelling: a small signal, at about 6 % of the intensity of that expected for unlabelled material, is observed at one of the sites of deuteration indicating that some H/D exchange has occurred.

Residual Solvents: small amounts of dichloromethane (0.4 % w/w) and diethyl ether (0.4 % w/w) are observed.

Impurities: traces of unidentified impurities are seen in the baseline.

Carbon-13 NMR Spectrum

Identity: the signals are consistent with the proposed structure and in accord with literature where available.

Isotopic Labelling: signals at the sites of deuteration have collapsed to small multiplets compared with the spectrum of unlabelled material, indicating clean deuteration.

High-resolution Mass Spectrum (ESI+)

Found m/z 335.1878. $C_{18}H_{12}D_8^{35}ClN_4$ $[M+H]^+$ requires m/z 335.1879. The deviation of 0.3 ppm is within normally accepted limits for the establishment of identity by HRMS. No signal for d_0 material was seen (detection limit about 0.5 %).

HPLC

A sharp, symmetrical peak is observed (99.9 %). Note: in the absence of reference materials for preparing calibration curves, it is assumed that all peaks have the same detector response. Where possible, the conditions of analysis follow a pharmacopeial or literature method, or have been adapted from same.

Elemental Analysis

	Found:	C 64.37, H 3.34, D 4.85, N 16.73 %
$C_{18}H_{11}D_8ClN_4$	Requires:	C 64.56, H 3.31, D 4.81, N 16.73 %

The elemental analyses fall within generally accepted limits for establishing the molecular formula given. The results may also be taken to imply the absence of significant quantities of water or inorganic salts (which have not been elsewhere tested for because of sample size limitations).

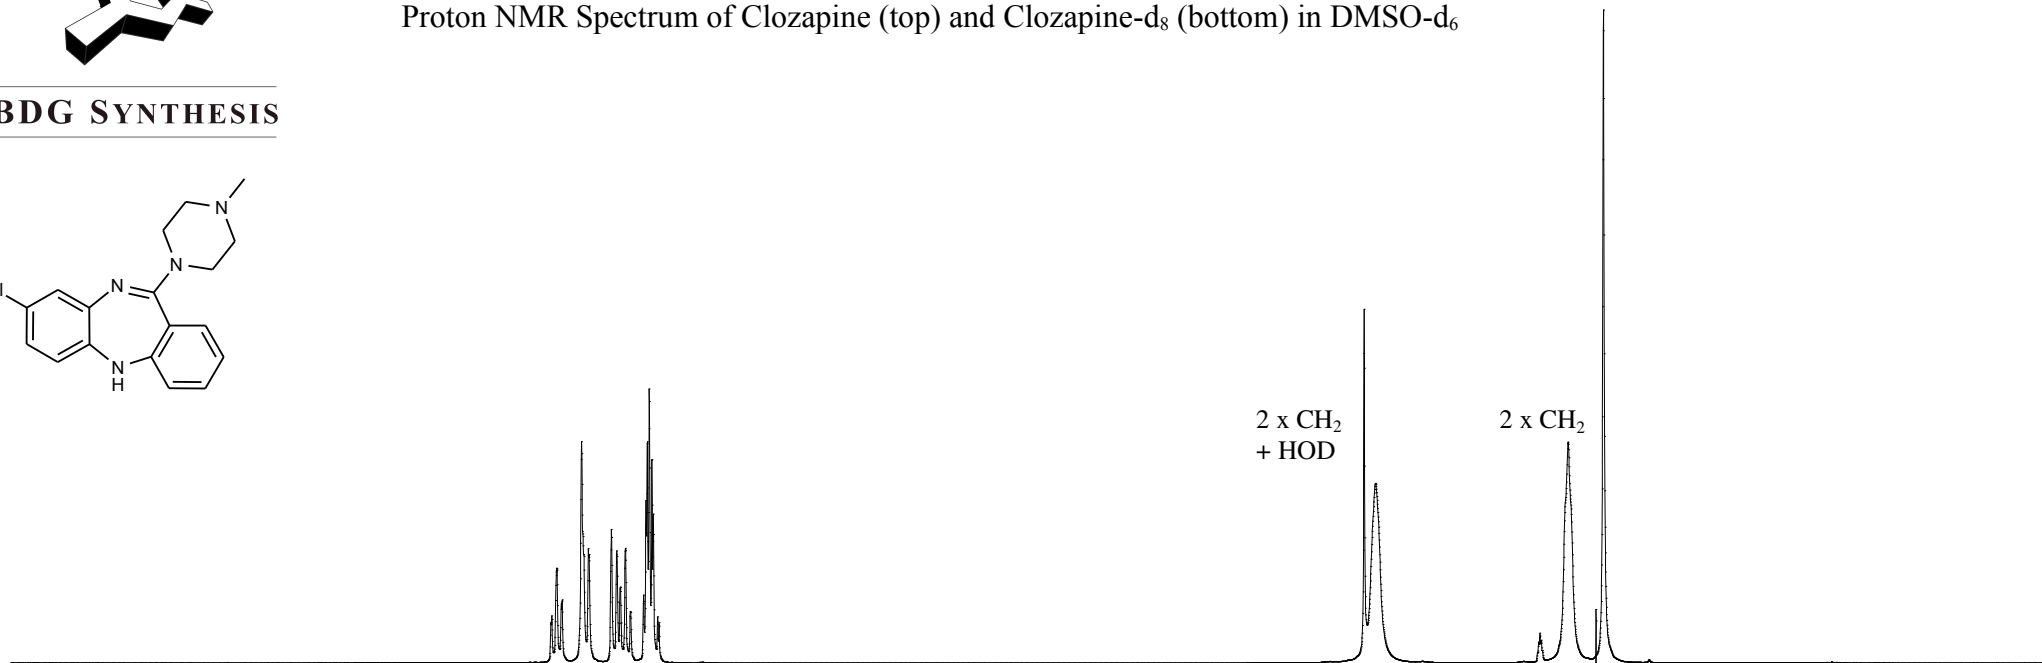

The available quantity of custom-synthesised material is always small, and this limits the extent and type of analytical data which can be obtained. This Certificate is presented in descriptive format for use by analytical chemists who are trained in the use of custom-synthesised materials. Custom materials often contain higher levels of residual solvents and/or water, and we urge you to use the corrected purity where needed rather than the raw HPLC purity. This compound is intended for use as an analytical reference material and it is not for human administration. Structures are shown with relative stereochemistry unless otherwise specified.

The re-test date is assigned from experience gained with the material in the laboratory and/or on storage. It is not possible to perform formal storage studies because of the small amount of material available.

BDG - Analysis of Clozapine-d8

Column : Phenomenex Luna C18(2) 5um 250 x 4.6 mm
 Guard : Phenomenex Security Guard C18 RP 4 x 3 mm
 Mobile Phase : 25:75:0.075 Water : Methanol : Triethylamine
 Flow Rate : 1.0 mL/min
 Sample Solvent : Mobile Phase
 Column Temperature : 20C
 Injection Volume : 10 uL
 Detection : UV at 257 nm

Sample Name	BDG 14055.3	Instrument	AnalyticalLC01
Acquisition	12/11/2011, 15:25:44	Method (rev.)	LC10380a (4)
Sequence	BDG_12Nov2011a - Reprocessed	Vial Position	71
Operator	solvation010\cerityadmin	Injection	1 of 1
